

CDAC Mumbai

Module: WPT

Topic: Lamborghini Assignment

Problem Statement: Creative Website Project (In loving memory of our beloved **John Doe**)

Objective:

To create a replica of a website using HTML and CSS, focusing on design, layout, and interactivity.

Requirements:

- **Navigation Bar:** A fixed navigation bar that remains at the top of the page with links to all pages.
- **Footer:** A consistent footer at the bottom of each page with contact information and social media links.
- **Pages:** Home, About Us, Sign-up, Sign-in, Contact Us. Each page should have unique content and a cohesive design.
- **Button Hover Effects:** Buttons should change colour when hovered over and display a different symbol or icon.
- **Menu Icon:** Include a menu icon, such as a hamburger menu, for mobile responsiveness.
- **Responsiveness:** The website should be responsive and adapt to different screen sizes.
- **Dropdown:** Use dropdown menus for navigation or other interactive elements.
- **Logo:** Include a logo in the header or navigation bar.
- **Favicon:** Add a favicon to the website for branding and visual appeal.
- **Scrolling Text:** Use scrolling text or other dynamic elements to enhance the website's interactivity.
- **Theme:** Proper theme should be followed. Every page should be well-connected and navigated

Submission Guidelines:

- Submit the source code to your GitHub repository.
- Include screenshots or videos showcasing the website's responsiveness and interactivity, on PGDAC official group.
